Dublin, Ireland · Stamp 1G (full-time work authorisation) · Full Irish Driving Licence – Cat B

PROFILE

MSc Cloud Computing graduate (2:1, National College of Ireland) and AWS Certified Cloud Practitioner with a High Distinction Bachelor of Information Technology (GPA 6.13/7, James Cook University Singapore), currently based in Dublin on a Stamp 1G visa with full-time work authorisation.

Hands-on experience designing, deploying, and maintaining cloud infrastructure on AWS and Microsoft Azure, provisioning infrastructure with Terraform, managing containerised workloads with Docker and Kubernetes, and automating CI/CD pipelines with GitHub Actions, AWS CodeBuild, and GitLab CI/CD. Comfortable working across cloud networking, IAM, security configurations, monitoring, and the full infrastructure lifecycle from provisioning to production operations.

Strong communicator and problem solver with a track record of working across cross-functional teams, writing clear technical documentation, and picking up new tools quickly.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, Lambda, Elastic Beanstalk, SQS, SNS, DynamoDB, RDS, EMR, Kinesis, IoT Core, IAM, VPC, CloudWatch), Microsoft Azure (IoT Hub, PaaS, Cloud Native), GCP

Infrastructure as Code: Terraform, Ansible

DevOps and CI/CD: GitHub Actions, AWS CodeBuild, GitLab CI/CD, Docker, Kubernetes, SonarCloud

Monitoring and Observability: AWS CloudWatch, performance metrics, availability tracking, incident triage and escalation

Security: IAM, VPC security groups, RBAC, container image vulnerability scanning, SQL injection and XSS remediation, SonarCloud

Scripting and Programming: Python, Bash (Linux CLI), JavaScript, C++, HTML, CSS

Frameworks: Django, Flask, Node.js, React, Bootstrap

Networking: TCP/IP, HTTP, DNS, VPC networking, load balancing, distributed systems

Databases: DynamoDB, RDS, S3, SQL, NoSQL

Data and Analytics: Apache Spark, PySpark, Hadoop, Amazon EMR, Amazon Kinesis, PyTorch, Machine Learning, Federated Learning

Tools: Git, GitHub, Linux CLI, SonarCloud

Certifications: AWS Certified Cloud Practitioner (Jan 2024) · Best Design Thinking Award, Agile and Scrum Master Design Sprint (May 2023)

EDUCATION

MSc in Cloud Computing (2:1), National College of Ireland, Dublin Jan 2025 – Apr 2026

Cloud Architectures, Cloud Platform Programming, Cloud DevOpsSec, Scalable Cloud Programming, Fog and Edge Computing, Blockchain Concepts, Cloud Machine Learning, Data Governance and Ethics, Research Project

Bachelor of Information Technology (GPA 6.13/7), James Cook University, Singapore Nov 2021 – Aug 2024

Awarded Best Design Thinking for a Design Sprint (2023).

PROFESSIONAL EXPERIENCE

Computing Lab Assistant, National College of Ireland Sep 2025 – Present

- Diagnosed and resolved technical issues for 200+ students across AWS, cloud platforms, programming environments, and containerised systems, applying structured triage and escalation methodologies within session SLAs.
- Facilitated weekly lab sessions for 30+ students across cloud computing, IoT, DevOps, and security modules, consistently receiving positive feedback on technical accuracy and delivery.
- Collaborated with lecturers to plan and deliver tutorial content weekly, maintaining proactive cross-functional coordination in a fast-paced academic environment.

International Peer Mentor, National College of Ireland Aug 2025 – Present

- Guided 300+ international students through orientation and onboarding, coordinating Welcome Programme activities and managing multiple communication channels simultaneously.
- Organised and delivered student engagement events end-to-end, applying project coordination and time management skills across concurrent responsibilities.

IT Peer Tutor, [James Cook University, Singapore](#)

Apr 2022 – Aug 2024

- Delivered structured one-to-one and group tutoring for 50+ students over 3 years across C++, Python, cybersecurity, and web development as part of JCU Singapore's formal EMAS Peer Tutoring Programme.
- Independently expanded scope to cover cybersecurity and web development in response to emerging student demand, demonstrating initiative and self-directed professional growth.

AI Prompt and Response Evaluator, Project Aether, *Outlier*

Nov 2025 – Dec 2025

- Evaluated AI-generated code and technical responses for accuracy and quality, contributing to model improvement across software engineering tasks.

Content Auditor, Project Mosaic, *Apple via TransPerfect*

Mar 2026 – May 2026

- Reviewed digital content against structured platform guidelines across multiple categories, meeting accuracy thresholds of up to 90% within defined attempt limits.

PROJECTS

Security Automation for Cloud-Native Applications

Nov 2023 – Jan 2024

- Managed a Kubernetes cluster end-to-end, deploying containerised workloads, configuring RBAC and namespace-level access controls, and troubleshooting pod and node issues across test environments.
- Built GitLab CI/CD pipelines to automate container image vulnerability scanning throughout the build and deployment lifecycle, enforcing consistent security and compliance standards.

[Event Manager Application with CI/CD Pipeline](#)

Jan 2025 – Apr 2025

- Provisioned and operated AWS Elastic Beanstalk infrastructure with automated CI/CD via GitHub Actions and AWS CodeBuild, enforcing code quality and security standards through SonarCloud integration.
- Identified and mitigated 9 security vulnerabilities including SQL injection and XSS through systematic security hardening, with IAM policies controlling access across S3 and application resources.

[Scoot Éire: Cloud-Based Electric Scooter Rental System](#)

Feb 2025 – May 2025

- Designed and deployed a scalable Django application on AWS Elastic Beanstalk with DynamoDB and S3, implementing full CI/CD automation via GitHub Actions and authoring reusable Python utility libraries for geolocation and input validation.

[MSc Research: Adaptive Federated Learning for Smart City Traffic Prediction](#)

Sep 2025 – Jan 2026

- Designed and implemented a distributed system using Python, PyTorch, Docker, and AWS S3, managing the full infrastructure lifecycle from architecture design through to performance evaluation across heterogeneous IoT edge devices.
- Benchmarked results against FedAvg and FedProx baselines across three real-world datasets (PeMSD8, SZ-Taxi, Los-Loop), demonstrating data-driven analytical methodology and reproducibility.

[Scalable Sentiment Analysis Pipeline – AWS and Big Data](#)

May 2025 – Jul 2025

- Built a cloud-native pipeline processing 11GB+ of unstructured data across 1.8M+ records using Amazon EMR, Kinesis, and S3, achieving 2.93x throughput improvement via hybrid Spark and Python multithreading parallelism.

[Edge-Fog-Cloud IoT Architecture for Aircraft Environmental Monitoring](#)

Jul 2025 – Aug 2025

- Designed a proof-of-concept Edge-Fog-Cloud IoT architecture using iFogSim, Azure IoT Hub, and Python, achieving 73.5% latency reduction and 50% data volume reduction versus cloud-only processing.

SOFT SKILLS AND INTERESTS

Analytical Thinking · Problem Solving · Cross-functional Collaboration · Communication · Attention to Detail · Adaptability · Self-motivated · Stakeholder Management
